<p>Unique Selling Points (USP):</p>    	<p>The only professional carding blade/de-shedder with suction</p> <p>The PetVac with Shed Eliminator is a unique patented concept. It hooks to any vacuum cleaner to groom pets. Pets love the feeling of suction combined with the PetVac grooming tools.</p> <p>PetVac with Shed Eliminator can be used right in the living room, all year round, since the suction is removing the hair and dander from the source, the pet and groomer are protected and not being exposed to the mess.</p> <p>Pets aren't afraid Because PetVac has an extra long hose the vacuum cleaner and PetVac can sit in another room away from the pet. The pet will not see or hear the vacuum cleaner and will not be scared.</p> <p>No mess - a total solution PetVac with Shed Eliminator is designed to safely and gently remove loose undercoat. (without cutting hair) Most de-shedding blades (without suction) work well at removing the loose undercoat, but they create another problem, they make a serious mess in the home. PetVac however, sucks it all up in the process. PetVac collects your pet's shedding in the bucket, which easily empties in the garbage. It is the total solution.</p> <p>PetVac helps to avoid allergic reactions while grooming If not eliminated right away, hair and dander can cause allergic reactions to the groomer and the pet. This is also a reason why most de-shedding tools are recommended to be used outside the home, which limits them to weather conditions, etc.</p>
---	---

CONS Euro 2023

Pricelist for Built in Vacuum Industry

	<p>Additional applications around the house</p> <p>Use PetVac's original grooming brush The original grooming brush can be used for a simple brushing session. It works well after a bath to remove moisture and loose hair.</p> <p>Replaceable carding blades for ShedEliminator Replacement blades specially positioned to extend gradually for Shed Eliminator S – M – L sizes.</p> <p>No time for a Wet Bath? Try dry bath Use dry bath to give your pet's coat a treatment that will clean, soften and give it a fresh fragrance. PetVac's dry Bath is ALL natural. Use the original grooming brush to suction out the used powder. Since the dry powder is so fine, Dry bath comes with two (5 count) packs of large dust bags. NEW with Flea Dehydrator</p> <p>De-Shedding shampoo 8 oz and conditioner Rinse Highly Concentrated and long lasting. A Safe Hypoallergenic Non-Irritating Formula. For best results use these before a major ShedEliminator (de-shedding) session/ treatment. Leaves pets cleaner, softer and smelling better than ever before.</p> <p><i>Shampoo:</i> Naturally enriched with Calendula extract, Omega 3+6 fatty acids, proteins to help strengthen hair follicles and control shedding.</p> <p><i>Conditioner Rinse:</i> Naturally enriched with Kava Extract, Aloe Vera, and vitamins to help release undercoat and strengthen hair.</p> <p>Wet spills PetVac can also be used for cleaning up wet spills on your floor – a must for potty training young pets, but also think of any other wet or nasty spill around the house. Use the transparent nozzle to remove the muck, rinse the dirty surface and suction out the moisture until dry.</p> <p>Lint and hair Lint and hair literally stick to clothing and furniture. Use PetVac with the suction lint brush tool to remove these and keep your home tidy with a minimum effort.</p>

CONS Euro 2023

Pricelist for Built in Vacuum Industry

  	<p>Reaching high and low PetVac's extra long hose (4.6m) keeps the PetVac and vacuum away from pets. And also helps you to reach where normal vacuum cleaner won't. On top of cupboards and lamps, the staircase, far corners.</p> <p>Drain de-blocking rubber Using PetVac together with this handy tool, using the suction of your vacuum cleaner to unclog sinks and bath tub drains without harmful chemical's, pumps, or plumbers. TIP If your vacuum cleaner hose end is too large to make a seal tightly to the standard cone shaped adaptor, use the unclogging tool as an additional adaptor.</p> <p>Extra large dust bags for your messiest jobs Especially useful when cleaning up fine dust like cold fireplace ashes and sheetrock dust or in the case of allergies to pets and fine pet dander; the extra large dust bags collect the dirt in them, so there is no chance of ruining your vacuum cleaner. Easily disposable.</p>
--	--

Emotional Value Points (EVP):

Regular use of the PetVac with Shed Eliminator contributes to a healthy coat of your pet. It will enjoy this new way of grooming.

Less shedding in the home will save you the embarrassment of pet hair all over the house when guests come to visit, the endless vacuuming and cleaning, and the constant checking and wiping of their hair off our clothes.

Once you have come to know the endless applications of this simple solution, you wonder how you ever managed without.

Target Group: Pet Owners and/or household cleaning

Product History:

PetVac is developed based on the Aqua Jumbo, the appliance for household purposes that turns any vacuum cleaner into a wet vac. PetVac was first introduced in the United States in 2006 and has seen continuous development ever since. Together with the ShedEliminator for which production started in June 2007, PetVac is now making a major break-through in the pet-care market.

Promotion line:

The ShedEliminator De-Shedding tool is designed to reduce pet shedding by up to 95% by gently removing loose undercoat hair (without cutting hair) in advance. When used in conjunction with PetVac there is virtually no mess during this process. A total solution!
