Unique Selling Points (USP):

The only professional carding blade/ de-shedder/ with suction

The PetVac with Shed Eliminator is a unique patented concept. It **hooks to any vacuum cleaner** to groom pets wet or dry.

PetVac with Shed Eliminator **can be used right in the living room, all year round**, and since the suction is removing the hair and dander from the source, the pet and groomer are protected and not being exposed to the mess.

No scared pets

Because PetVac has an **extra long hose** the vacuum cleaner and PetVac can sit in another room away from the pet. **The pet will not see or hear the vacuum cleaner** and will not be scared.

No mess - a total solution

PetVac with Shed Eliminator is designed to remove loose undercoat. Most of the de-shedding blades work well at removing the loose undercoat, but they create another problem, they make a serious mess. PetVac however, sucks it all up in the process.

PetVac collects your pet's shedding in the bucket, which easily empties in the garbage. It is the total solution to your needs.

PetVac helps to avoid allergic reactions

If not eliminated straight away hair and dander can cause allergic reactions to the groomer and the pet. This is also a reason why most deshedding tools are recommended to be used outside the home, which limits them to weather conditions, etc.

Use PetVac with the grooming brush

PetVac with the grooming brush can be used for a simple brushing session. It works well on wet and dirty fur too. Your pet's coat will dry while brushing.

| | |
|--|---|
|  | <p>Dry bath Use dry bath to give your pet's coat a treatment that will clean and give it a fresh fragrance. Use PetVac with the grooming brush to suck away the powder.</p> <p>De-Shedding shampoo 8 oz and Rinse</p> |
|--|---|

| | |
|---|--|
| <p>Additional applications around the house</p>     | <p>Wet spills PetVac can also be used for cleaning up wet spills on your floor – think of puppy training, but also think of any other wet or mucky spill around the house. Use the transparent nozzle to remove the muck, rinse the dirty surface, suck away the moist until dry.</p> <p>Lint and hair Lint and hair will occasionally stick to clothing and furniture. Use PetVac with the lint brush tool to remove these and keep your home tidy with a minimum effort.</p> <p>Reaching high and low PetVac's extra long hose (4.6m) helps you to reach where you would not easily get to with your vacuum cleaner. On top of cupboards and lamps, the staircase, far corners.</p> <p>Drain de-blocking rubber Using PetVac together with this handy tool, you can apply the suction of your vacuum cleaner to pull out wet debris from a sink and un-block the drain.</p> |

-5-

| | |
|--|--|
|  | <p>Extra large dust bags Especially useful when cleaning up fine dust or in case of a very high risk to allergic reactions; the extra large dust bags collect the dirt. Dispose of with ease.</p> |
|--|--|

Emotional Value Points (EVP):

Regular use of the PetVac with Shed Eliminator contributes to a healthy coat of your pet. It will enjoy this new way of grooming.

Less shedding in the home will save you the embarrassment of pet hair all over the house when guests come to visit, the endless vacuuming and cleaning, and the constant checking and wiping of their hair off our clothes.

Once you have come to know the endless applications of this simple solution, you wonder how you ever managed without.

Target Group:

Pet Owners

Product History:

PetVac is developed based on the Aqua Jumbo, the appliance for household purposes that turns any vacuum cleaner into a wet vac. PetVac was first introduced in the United States in 2006 and has seen continuous development ever since. Together with the ShedEliminator for which production started in June 2007, PetVac is now making a major break-through in the pet-care market.
